

PCle-DIO24

Digital Input/Output

User's Guide

Your new Measurement Computing product comes with a fantastic extra —

Management committed to your satisfaction!

Thank you for choosing a Measurement Computing product—and congratulations! You own the finest, and you can now enjoy the protection of the most comprehensive warranties and unmatched phone tech support. It's the embodiment of our mission:

- To provide data acquisition hardware and software that will save time and save money.

Simple installations minimize the time between setting up your system and actually making measurements. We offer quick and simple access to outstanding live FREE technical support to help integrate MCC products into a DAQ system.

Limited Lifetime Warranty: Most MCC products are covered by a limited lifetime warranty against defects in materials or workmanship for the life of the product, to the original purchaser, unless otherwise noted. Any products found to be defective in material or workmanship will be repaired, replaced with same or similar device, or refunded at MCC's discretion. For specific information, please refer to the terms and conditions of sale.

Harsh Environment Program: Any Measurement Computing product that is damaged due to misuse, or any reason, may be eligible for replacement with the same or similar device for 50% of the current list price. I/O boards face some harsh environments, some harsher than the boards are designed to withstand. Contact MCC to determine your product's eligibility for this program.

30 Day Money-Back Guarantee: Any Measurement Computing Corporation product may be returned within 30 days of purchase for a full refund of the price paid for the product being returned. If you are not satisfied, or chose the wrong product by mistake, you do not have to keep it.

These warranties are in lieu of all other warranties, expressed or implied, including any implied warranty of merchantability or fitness for a particular application. The remedies provided herein are the buyer's sole and exclusive remedies. Neither Measurement Computing Corporation, nor its employees shall be liable for any direct or indirect, special, incidental or consequential damage arising from the use of its products, even if Measurement Computing Corporation has been notified in advance of the possibility of such damages.

Trademark and Copyright Information

Measurement Computing Corporation, InstaCal, Universal Library, and the Measurement Computing logo are either trademarks or registered trademarks of Measurement Computing Corporation. Refer to the Copyrights & Trademarks section on mccdaq.com/legal for more information about Measurement Computing trademarks. Other product and company names mentioned herein are trademarks or trade names of their respective companies.

Notice

Measurement Computing Corporation does not authorize any Measurement Computing Corporation product for use in life support systems and/or devices without prior written consent from Measurement Computing Corporation. Life support devices/systems are devices or systems that, a) are intended for surgical implantation into the body, or b) support or sustain life and whose failure to perform can be reasonably expected to result in injury. Measurement Computing Corporation products are not designed with the components required, and are not subject to the testing required to ensure a level of reliability suitable for the treatment and diagnosis of people.

bold text **Bold** text is used for the names of objects on a screen, such as buttons, text boxes, and check boxes.

italic text *Italic* text is used for the names of manuals and help topic titles, and to emphasize a word or phrase.

Where to find more information

Additional information about PCIe-DIO24 hardware is available on our website at www.mccdaq.com. You can also contact Measurement Computing Corporation with specific questions.

- Knowledgebase: kb.mccdaq.com
- Tech support form: www.mccdaq.com/support/support_form.aspx
- Email: techsupport@mccdaq.com
- Phone: 508-946-5100 and follow the instructions for reaching Tech Support

If you need to program at the register level in your application, refer to the *Register Map for the PCIe-DIO24*. This document is available on our website at www.mccdaq.com/registermaps/RegMapPCIe-DIO24.pdf.

Introducing the PCIe-DIO24

Overview: PCIe-DIO24 features

This manual explains how to install and use the PCIe-DIO24 board. The PCIe-DIO24 is a digital I/O board designed for the PCI Express (PCIe) bus.

The PCIe-DIO24 provides 24 lines of digital I/O with selectable 3.3 V and 5 V logic levels. The 24 DIO lines are organized into three groups of 8-bits each (Port A, Port B, and Port C). Port C can be further divided into two four-bit ports (Port C-HI and Port C-LO). The direction of each port is independently configurable with software for either input or output. Digital outputs are HC logic and can source and sink 2.5 mA.

The PCIe-DIO24 has a 10 k resistor network associated with each digital port. You can configure each port for pull-up or pull-down with software. On power up and reset the configuration of each port is read from EEPROM. The board is shipped with each port configured in the pull-up state.

The PCIe-DIO24 emulates the 82C55 Programmable Peripheral Interface (PPI) chip. Measurement Computing's Universal Library and Windows driver supports mode 0 only.

Digital I/O lines are accessible through a 37-pin D-type connector. The board has two individual slow blow fuses rated at 0.375 amp to protect the +V_{DIO} and +12V outputs on the connector. One spare fuse is provided.

Software programs written with the Universal Library for the USB-DIO24/37, PCI-DIO24 and CIO-DIO24 devices are fully compatible with the PCIe-DIO24.

Power is provided by the PCI Express slot. The PCIe-DIO24 board is completely plug-and-play. All board addresses are set by the board's plug-and-play software. Board configuration is controlled by your system's BIOS.

Functional block diagram

PCIe-DIO24 functions are illustrated in the block diagram shown here.

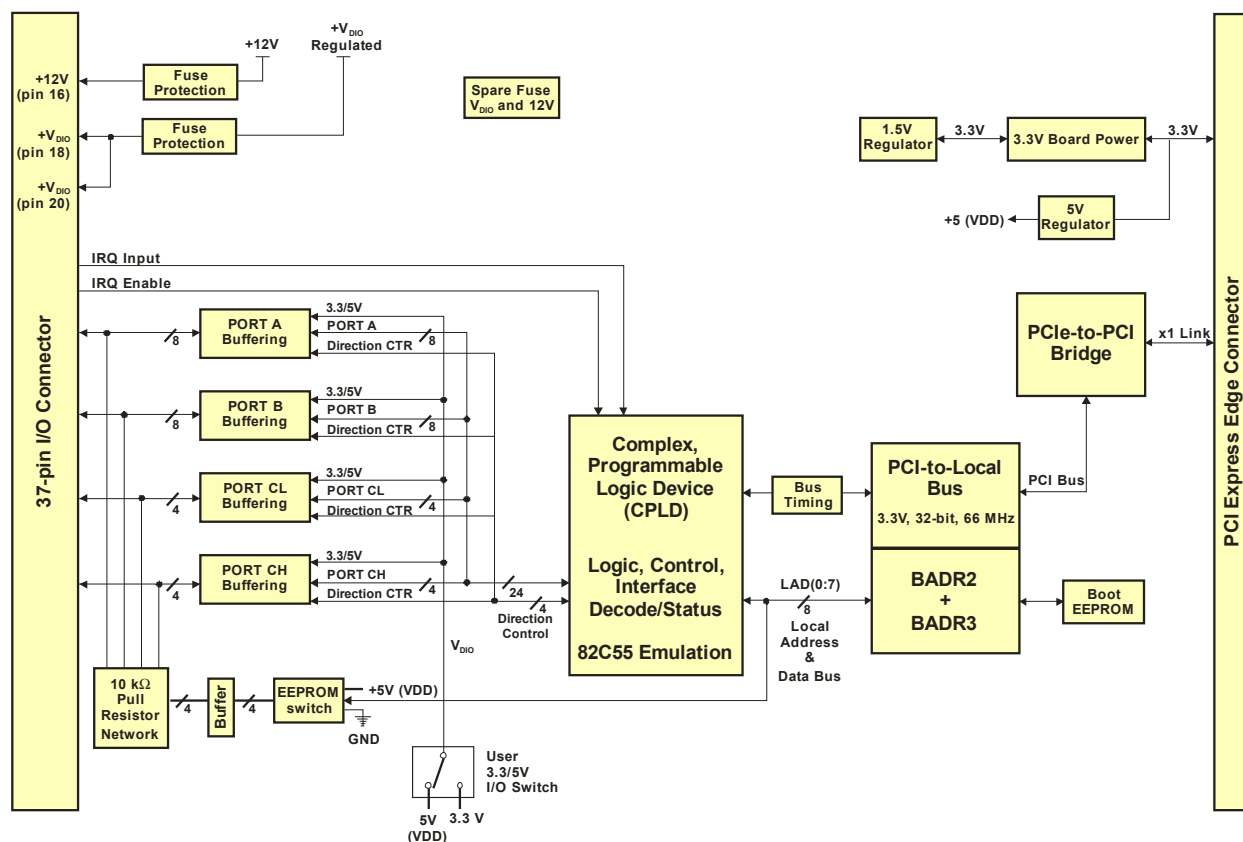

Figure 1. PCIe-DIO24 functional block diagram

Installing the PCIe-DIO24

What comes with your shipment?

The following items are shipped with the PCIe-DIO24:

Hardware

- PCIe-DIO24

Software

- MCC DAQ CD

Documentation

- MCC DAQ Quick Start

This booklet provides an overview of the MCC DAQ software you received with the device, and includes information about installing the software. Please read this booklet completely before installing any software or hardware.

Optional components

- Cables
 - C37FF-x
 - C37FFS-x
- Signal termination and conditioning accessories

Measurement Computing provides signal termination products for use with the PCIe-DIO24. Refer to the section "Field wiring and signal termination" on page 10 for compatible accessory products

Unpacking the PCIe-DIO24

As with any electronic device, you should take care while handling to avoid damage from static electricity. Before removing the PCIe-DIO24 from its packaging, ground yourself using a wrist strap or by simply touching the computer chassis or other grounded object to eliminate any stored static charge.

If any components are missing or damaged, contact us immediately using one of the following methods:

- Knowledgebase: kb.mccdaq.com
- Tech support form: www.mccdaq.com/support/support_form.aspx
- Email: techsupport@mccdaq.com
- Phone: 508-946-5100 and follow the instructions for reaching Tech Support

For international customers, contact your local distributor. Refer to the International Distributors section on our website at www.mccdaq.com/International.

Installing the software

Refer to the *MCC DAQ Quick Start* for instructions on installing the software on the MCC DAQ CD. This booklet is available in PDF at www.mccdaq.com/PDFmanuals/DAQ-Software-Quick-Start.pdf.

Installing the hardware

The PCIe-DIO24 is completely plug-and-play. Configuration is controlled by your system's BIOS. To install your board, follow the steps below.

Install the MCC DAQ software before you install your board

The driver needed to run your board is installed with the MCC DAQ software. Therefore, you need to install the MCC DAQ software before you install your board. Refer to the *Quick Start Guide* for instructions on installing the software.

1. Power off and unplug the computer, and remove the cover to expose the expansion slots.
2. Touch any metal part of the computer to discharge static electricity that may be present. Static electricity can damage the board.
3. Insert the PCIe-DIO24 into an unused x1 PCIe expansion slot.

The PCIe-DIO24 is designed to install into an x1 slot. However, you can also install the board into an unused x4, x8, or x16 PCIe slot.

Caution! Ensure that you install the board into a PCIe slot. Installing the PCIe-DIO24 into a non-PCIe slot can damage both the board and the computer's motherboard.

4. Close your computer and turn it on.

A dialog box opens as the system loads, indicating that new hardware has been detected. The information file for this board should have already been loaded onto your PC when you installed the *Measurement Computing Data Acquisition Software* CD supplied with your board, and should be detected automatically by Windows. If you have not installed this software, cancel the dialog and install it now.

5. Run *InstaCal* to test your installation and to configure the pull direction of the digital port resistors.

Refer to the *Quick Start Guide* that came with your board for information on how to initially set up *InstaCal*.

Signal connections

The table below lists the board I/O connector, applicable cables and compatible accessory boards.

Board connectors, cables, accessory equipment

Connector type	37-pin D-type	
Compatible cables	C37FF-x unshielded ribbon cable. x = length in feet. (see Figure 3) C37FFS-x cable shielded round cable. x = length in feet. (see Figure 4)	
Compatible accessory products (with the C37FF-x or C37FFS-x cable)	SCB-37 CIO-MINI37 CIO-MINI37-VERT CIO-ERB08	CIO-SERB08 CIO-ERB24 SSR-RACK08 SSR-RACK24

Connector pinout

The I/O connector is a 37-pin, male D-type connector accessible from the rear of the computer through the expansion backplate. The signals available are direct connections to the digital I/O chips as well as the computer's internal power supplies. The logic level switch sets the logic level for either 3.3V or 5V; refer to page 11 for switch information.

Figure 2. I/O connector

* The board has two individual slow blow fuses rated at 1 A. One fuse protects the 12V output at pin 16, and one fuse protects both +V_{DIO} outputs at pin 18 and pin 20.

Cabling

Figure 3. C37FF-x cable

Figure 4. C37FFS-x cable

Field wiring and signal termination

You can use the following MCC screw terminal boards and relay racks with the PCIe-DIO24 board using the C37FF-x or C37FFS-x cable:

- SCB-37 – 37-conductor, shielded signal connection/screw terminal box that provides two independent 37-pin connections.
- CIO-MINI37 – 4 x 4, 37-pin screw terminal board.
- CIO-MINI37-VERT – 37-pin screw terminal accessory with vertical 37-pin male D connector. Details on this product are available on our website at www.mccdaq.com/cbicatalog/cbiproduct.asp?dept_id=102&pf_id=256.
- SSR-RACK24 – 24-position solid state relay rack.
- SSR-RACK08 – Eight-channel solid state relay rack.
- CIO-ERB08 – Eight-channel electromechanical relay accessory for digital I/O boards.
- CIO-SERB08 – Eight Form C and ten socketed relay accessory for digital I/O boards.
- CIO-ERB24 – 24-channel electromechanical relay accessory for digital I/O boards.

For additional information about digital interfacing

Detailed information regarding digital interfacing is contained in MCC's *Guide to Signal Connections*. This document is available on our website at www.measurementcomputing.com/signals/signals.pdf.

Functional Details

82C55 emulation

The PCIe-DIO24 emulates the 82C55 Programmable Peripheral Interface (PPI) chip. Measurement Computing's Universal Library and Windows driver supports mode 0 only.

Whenever the board is powered on or reset, all pins are set to high-impedance input. Based on standard TTL functionality, these inputs typically float high, and may have enough drive current to turn on external devices. Consequently, if you have output devices such as solid state relays, they may be switched on whenever the computer is powered on or reset. To prevent unwanted switching, and to drive all outputs to a known state after power on or reset, configure each port resistor with *InstaCal*.

Unconnected inputs float to the pull direction

Unconnected inputs will float in the pull direction that is configured for the port with *InstaCal* (either up/high or down/low).

Replacing a fuse

The PCIe-DIO24 has two individual 0.375 amp slow blow fuses. One fuse is connected to the 12V output at pin 16, and is labeled **F7** on the board. The second fuse is connected to both +V_{DIO} outputs at pin 18 and pin 20, and is labeled **F6** on the board. A spare fuse is installed on the board at location **F4**. All fuses are secured to the board with clips for convenient replacement.

A fuse will blow during operation if amperage exceeds 0.375 amp. If you need to replace a fuse, perform the following procedure.

1. Hold the center of the blown fuse and pry it from the fuse holder clip.
2. Insert the replacement fuse into the fuse holder clip.

Fuse specifications

Refer to the information below to purchase additional fuses, if required:

- Manufacturer: Littelfuse®
- Type: 452 Series NANO²® Slo-Blo® Subminiature Surface Mount Fuse
- Part number: 0452.375
- 0.375 amp, 125 volts, 1.2 Ω

Logic level switch

Use switch S1 to set the logic level for either 3.3V or 5V (default). The switch is located above the I/O connector (see Figure 2 on page 9).

Figure 5. Logic level select switch

Specifications

All specifications are subject to change without notice.

Typical for 25 °C unless otherwise specified.

Digital input/output

Table 1. Digital I/O specifications

Parameter		Specification
Digital type		82C55 Emulation
Configuration		2 banks of 8, 2 banks of 4, programmable by bank as input or output
Output		Ports A and B: 74HC245A Port C: 74HC126
Input		Ports A and B: 74HC245A Port C: 74HC125
Number of channels		24 I/O
Switch state		Board silk screen reference: S1 – Default +5V
Output high	3.3 V	2.8 volts min @ -2.5 mA
Output low		0.3 volts max @ 2.5 mA
Input high		2.6 volts min, 3.6 volts absolute max
Input low		1.3 volts max, -0.5 volts absolute min
Output high	5 V	4.5 volts min @ -2.5 mA
Output low		0.3 volts max @ 2.5 mA
Input high		2.6 volts min, 5.5 volts absolute max
Input low		1.3 volts max, -0.5 volts absolute min
Power-up /reset state		Input mode (10 kΩ impedance from pull-up or pull-down)
Pull-up/pull-down resistors		EEPROM stored; software programmable driven by 74ACT244 through 10 kΩ bussed resistor networks (shipped in the pull-up state)
Interrupt enable		External (IRQ ENABLE, active low, disabled by default through internal resistor to TTL high) and programmable through PCI9030; 0 = disabled, 1 = enabled (default)
Interrupt sources		External source (IRQ INPUT), polarity programmable through PCI9030; 1 = active high, 0 = active low (default)

Power consumption

Table 2. Power consumption specifications

Parameter	Specification
+3.3 V operating	515 mA typ
+3.3 V with 5 V I/O	520 mA typ
+V _{DIO} User output	125 mA max @ +5V; 375 mA max @ +3.3 V
Fuses	+V _{DIO} User output and +12 V: Littelfuse 0.375A NANO ² ® Slo-Blo [®] Subminiature Surface Mount Fuse; art number 0452.375

Environmental

Table 3. Environmental specifications

Parameter	Specification
Operating temperature range	0 °C to 50 °C
Storage temperature range	–20 °C to 70 °C
Humidity	0% to 90% non-condensing

Mechanical

Table 4. Environmental specifications

Parameter	Specification
Dimensions (L × W × H)	167.4 × 111.2 × 18.72 mm (6.60 × 4.38 × 0.74 in.)

Bus

Table 5. Bus specifications

Parameter	Specification
Bus Type	PCI Express 1.1
Bus Width	x1 lane PCI Express

Signal connector

Table 6. Main connector specifications

Parameter	Specification	
Connector type	37-pin D-type	
Compatible cables	C37FF-x unshielded ribbon cable. x = length in feet. C37FFS-x cable shielded round cable. x = length in feet.	
Compatible accessory products (with the C37FF-x or C37FFS-x cable)	SCB-37 CIO-MINI37 CIO-MINI37-VERT	
Compatible accessory products with S1 in the +5 V position(with the C37FF-x or C37FFS-x cable)	CIO-ERB08 CIO-SERB08 CIO-ERB24	SSR-RACK08 SSR-RACK24

Table 7. Signal connector pinout

Pin	Signal Name	Pin	Signal Name
1	IRQ INPUT	20	+V _{DIO} (Note 1)
2	IRQ ENABLE	21	GND
3	Port B7	22	Port C7
4	Port B6	23	Port C6
5	Port B5	24	Port C5
6	Port B4	25	Port C4
7	Port B3	26	Port C3
8	Port B2	27	Port C2
9	Port B1	28	Port C1
10	Port B0	29	Port C0
11	GND	30	Port A7
12	OPEN	31	Port A6
13	GND	32	Port A5
14	OPEN	33	Port A4
15	GND	34	Port A3
16	+12V (Note 1)	35	Port A2
17	GND	36	Port A1
18	+V _{DIO} (Note 1)	37	Port A0
19	GND		

Note 1: Protected by slow blow fuses rated at 0.375 A. One fuse protects pin 16 (+12V), and the second fuse protects pin 18 (+V_{DIO}) and pin 20 (+V_{DIO}).

CE Declaration of Conformity
According to ISO/IEC 17050-1:2010

Manufacturer: Measurement Computing Corporation
Address: 10 Commerce Way
Suite 1008
Norton, MA 02766

USA

Product Category: Electrical equipment for measurement, control and laboratory use.
Date and Place of Issue: September 12, 2014, Norton, Massachusetts USA

Measurement Computing Corporation declares under sole responsibility that the product

PCIe-DIO24

Complies with the essential requirements of the following applicable European Directives:

Electromagnetic Compatibility (EMC) Directive 2004/108/EC
Low Voltage Directive 2006/95/EC
RoHS Directive 2011/65/EU

Conformity is assessed in accordance to the following standards:

EMC:

Emissions:

- EN 61326-1:2006 (IEC 61326-1:2005), Class A
- EN 55011: 2007 (IEC CISPR 11:2003), Group 1, Class A

Immunity:

- EN 61326-1:2006 (IEC 61326-1:2005), Controlled EM Environments
- EN 61000-4-2:2001 (IEC 61000-4-2:2001)
- EN 61000-4-3 :2002 (IEC61000-4-3:2002)
- EN 61000-4-4 :2004 (IEC61000-4-4:2004)
- EN 61000-4-5 :2001 (IEC61000-4-5:2001)
- EN 61000-4-6 :2007 (IEC61000-4-6:2003)
- EN 61000-4-11:2004 (IEC61000-4-11:2004)

Safety:

- EN610101-1 (IEC61010-1)

Environmental Affairs:

Articles manufactured on or after the Date of Issue of this Declaration of Conformity do not contain any of the restricted substances in concentrations/applications not permitted by the RoHS Directive.
